

TECHNICAL DATASHEET

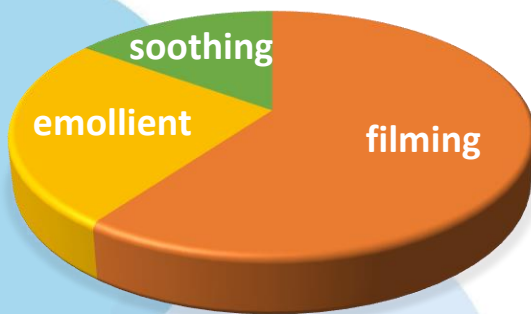

IOCUP

Zootechny / Teat hygiene

Post-dipping filming gel with povidone iodine

Features

Filming gel indicated for post-milking treatment with povidone iodine (1150 ppm). Thanks to its formulation, IOCUP helps protect the breasts by forming a protective film that performs an emollient and soothing action while preserving the natural characteristics of the skin. IOCUP has a stable color which always allows a clear identification of the treated parts.

Application fields

IOCUP is employed in the zootechny-veterinary sector.

How to use

Treat the affected parts directly using the appropriate applicator cup. Before milking, clean the treated parts thoroughly with paper or disposable wipes.

Concentration of use: as it is, without dilution

Leave to act for: until the next milking

Features

Form: gel
pH: 4-5
density: 1,01 – 1,05 g/cm³ @25 °C

Compatibility

No incompatibility known.

Packaging

Canister: 10 kg 20 kg

Barrel: 200 kg

IBC: 1000 kg

Other information

IOCUP does not meet the classification criteria of Regulation (EC) no. 1272/2008 (CLP).

IOCUP is not defined as dangerous for the different modes of transport according to the "United Nations Recommendations on the Transport of Dangerous Goods - Model Regulations".
