

## TECHNICAL DATASHEET

# IODIOGEL

### **Zootechny / Teat hygiene**

*Post-dipping gel with povidone iodine*

#### **Features**

Post-milking gel with high emollient power indicated for post-milking cleaning with povidone iodine (1150 ppm). The presence of emollients and softeners give the product moisturizing and emollient power. Thanks to its formulation, IODIOGEL helps protect the breasts and performs an emollient and soothing action while preserving the natural characteristics of the skin. IODIOGEL has a stable color which always allows a clear identification of the treated parts.

#### **Application fields**

IODIOGEL is employed in the zootechny-veterinary sector.

#### **How to use**

Treat the affected parts directly using the appropriate applicator cup. Before milking, clean the treated parts thoroughly with paper or disposable wipes.

Concentration of use: as it is, without dilution

Leave to act for: until the next milking

#### **Features**

Form: gel  
pH: 4-5  
density: 1,01 – 1,05 g/cm<sup>3</sup> @25 °C

#### **Compatibility**

No incompatibility known.

#### **Packaging**

Canister: 10 kg 20 kg

Barrel: 200 kg

IBC: 1000 kg

AZIENDA CERTIFICATA  
SECONDO GLI STANDARD  
DI QUALITÀ ISO 9001:2015

### Other information

IODIOGEL does not meet the classification criteria of Regulation (EC) no. 1272/2008 (CLP).

IODIOGEL is not defined as dangerous for the different modes of transport according to the "United Nations Recommendations on the Transport of Dangerous Goods - Model Regulations".

### Attention

*This technical data sheet is intended to be purely indicative. For the definition of the correct protocol for the use of Devidet s.r.l. always consult the Devidet s.r.l. Technical Office, expert technicians will be able to provide the most suitable solutions for specific needs. Product for professional use only. We decline all responsibility for damage resulting from improper or unauthorized use of the product. Before use, check that the product matches the type of application required.
