

TECHNICAL DATASHEET

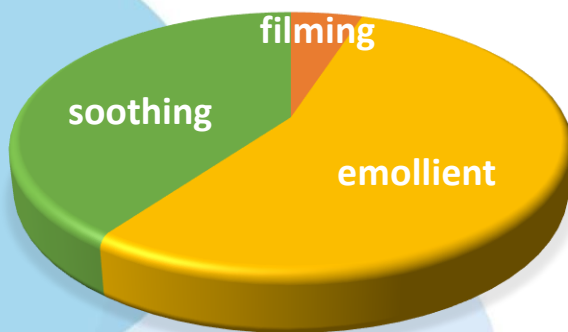

LACTIGEL

Zootechny / Teat hygiene

Post-dipping gel with lactic acid

Features

Post-dipping gel with a slightly filming effect with a highly emollient and soothing action, enriched with lanolin. The lactic acid contained in its formulation creates a buffer that guarantees an optimal pH to promote the repair of cracks and fissures. Thanks to its characteristics LACTIGEL is particularly suitable for the coldest periods of the year.

Application fields

LACTIGEL is employed in the zootechny-veterinary sector.

Modo d'uso

Treat the affected parts directly using the appropriate applicator cup. Before milking, clean the treated parts thoroughly with paper or disposable wipes.

Concentration of use: as it is, without dilution

Leave to act for: until the next milking

Features

Form: gel
pH: 4-5
density: 1,01 – 1,05 g/cm³ @25 °C

Compatibility

No incompatibility known.

Packaging

Canister: 10 kg 20 kg

Barrel: 200 kg

IBC: 1000 kg

AZIENDA CERTIFICATA
SECONDO GLI STANDARD
DI QUALITÀ ISO 9001:2015

Other information

LACTIGEL meet the classification criteria of Regulation (EC) no. 1272/2008 (CLP).

Hazard class and category: Eye damage / Irritation, 1

LACTIGEL is not defined as dangerous for the different modes of transport according to the "United Nations Recommendations on the transport of dangerous goods - Standard Regulations".
