

TECHNICAL DATASHEET

LACTIFOAM

Zootechny / Teat hygiene

Pre-dipping foaming detergent with lactic acid

Features

Ready-to-use foaming detergent specially formulated to gently cleanse the skin both before and after milking operations. Its emollient and soothing ingredients, including lanolin, and the long-term action of lactic acid preserve the skin's natural characteristics. LACTIFOAM forms a stable and light foam that completely covers the treated parts with a reduced consumption of product while guaranteeing a high contact time for a complete cleaning unit. LACTIFOAM is particularly suitable for the colder periods of the year, preventing the formation of cracks and fissures.

Application fields

LACTIFOAM is employed in the zootechny-veterinary sector.

How to use

Treat directly with a special applicator (manual or automated) wetting all the interested parts that come into contact with the milking unit. Before milking, clean the treated parts thoroughly with paper or disposable wipes.
