

TECHNICAL DATASHEET

PRE-ACTIVE

Zootechny / Teat hygiene

Pre-dipping foam with chlorine dioxide and lactic acid

Features

PRE-ACTIVE is a liquid solution based on LAS (lactic acid system) obtained from the combination of PRE-ACTIVE base with ACTIVATOR. Their combination leads to the formation of chlorine dioxide which, in association with lactic acid, helps to keep teats protected from external attacks. This product is specially designed for cleaning and removing dirt and organic substances from the udder before milking. Thanks to the presence of surfactants with wetting and degreasing effect, PRE-ACTIVE allows a quick and immediate cleaning.

Application fields

PRE-ACTIVE is employed in the zootechny-veterinary sector.

How to use

Combine 25 gr. of ACTIVATOR per kg of PRE-ACTIVE base by inverting the container 3-5 times. The product is immediately active. Proceed with the treatment of the interested parties with the specific applicator. Leave acting for a few seconds then clean the treated parts with a clean piece of paper or disposable wipes. Once activated, PRE-ACTIVE must be stored closed in its container and can be used within seven days after preparation. After this period, dispose of in accordance with the law.

Concentration of use: as it is, without dilution.

Leave to act for: some seconds.

Features

Form: foam
pH: 4-5
density: 1,03 – 1,05 g/cm³ @25 °C

Compatibility

Do not mix ACTIVATOR with acids or other substances except PRE-ACTIVE.

Packaging

Canister: 5 kg 10 kg 20 kg

Barrel: 200 kg

IBC: 1000 kg

Other information

PRE-ACTIVE, PRE-ACTIVE base and ACTIVATOR meet the classification criteria of Regulation (EC) no. 1272/2008 (CLP).

PRE-ACTIVE base and PRE-ACTIVE Hazard class and category: Eye damage / Irritation, 1

ACTIVATOR Hazard class and category: Eye damage / Irritation, 1 – Acute toxicity, 4.

AGENZIA CERTIFICATRICE
SECONDO GLI STANDARD
DI QUALITÀ ISO 9001:2015

Composition (Reg. 648/2004/CE):

<5% anionic surfactants

PRE-ACTIVE base, PRE-ACTIVE and ACTIVATOR are not defined as dangerous for the different modes of transport according to the "United Nations Recommendations on the transport of dangerous goods - Standard Regulations".

Attention

This technical data sheet is intended to be purely indicative. For the definition of the correct protocol for the use of Devidet s.r.l. always consult the Devidet s.r.l. Technical Office, expert technicians will be able to provide the most suitable solutions for specific needs. Product for professional use only. We decline all responsibility for damage resulting from improper or unauthorized use of the product. Before use, check that the product matches the type of application required. Before use, consult the safety data sheet or the information sheet.
